CIRCULAR WASTE CHUTE WITH LID

B-5321.91

(For Sale in India Only)

Rough Countertop Opening: - 205 ± 1.5 mm

MATERIALS:

Circular Waste Chute with Lid - Type-304, 22-gauge (2 mm) stainless steel. Exposed surfaces have a satin finish. Waste chute lid is balanced with a spot-welded swing mechanism on the back.

INSTALLATION:

Unit is designed for installation in 205 ± 1.5 mm diameter hole in any countertop. To install unit permanently in place, cut hole in countertop. Fill in underside of waste chute lip and around portion of waste chute body which protrudes down into mounting hole with silicone sealant (not furnished). Install unit into countertop hole. Once the unit is in place, wipe off any excess glue with a clean rag.

SPECIFICATION:

Circular waste chute with lid for mounting in countertops shall be type-304 stainless steel with 200mm inside diameter, flat lip and satin finish on exposed surfaces. Waste chute lid is balanced with a swing mechanism, so when pushed one side down, it tilts open and shall provide access to deposit waste into waste receptacle (not furnished) placed under the countertop.

Circular Waste Chute with Lid shall be Model B-5321.91 of Bobrick Washroom Equipment India Private Limited, India.
